MEMORANDUM FOR: Deputy Director for Intelligence

SUBJECT : Request for External Training in Geography for Mr. [REDACTED] NPIC

1. This memorandum contains a recommendation for approval of an external training program for Mr. [REDACTED]

2. NPIC has supported and funded external undergraduate training for a number of its career professionals. In practice, however, most of the officers selected for this kind of training have been technical specialists who received training in and who work in fields such as photo science and photogrammetry. The NPIC Career Service Board is endeavoring to extend external training opportunities into other areas of work within the Center. We reason that the Center's career service has become established in terms of reaching stable numbers and job functions, and that one of the most effective and least expensive ways of enhancing the future productivity and efficiency of the service will be through selective training. With that reason and that objective in mind, we have selected [REDACTED] as one officer whose future contribution to the service would be strengthened by undergraduate college training.

3. [REDACTED] is Deputy Chief of the Operations Support Section of the Geographic Services Branch at NPIC. He came to work for the Center in January of 1962 after having spent nine years in an Aerial Survey Unit with the U.S. Department of Agriculture in Beltsville, Maryland. His progress since joining the Center has been steady and he is considered to have further potential. [REDACTED] has been responsible for producing many unique geographic area products in support of overhead reconnaissance. He has demonstrated initiative and resourcefulness. He has received considerable recognition for his ideas including several suggestion awards and commendations.

4. [REDACTED] is a high school graduate. He also has, on his own time and at his own initiative, taken a number of college courses given by the University of Maryland. While such part-time academic work has been of value to him and to his contribution at the Center, we assess that much more could be gained from one full-time year of undergraduate work in the field of geography. This study could be done at the University of Maryland.

SUBJECT: Request for External Training in Geography for [REDACTED]
[REDACTED] NPIC

5. [REDACTED] is 38 years of age, married, has three children and served 18 months of active duty in the Air Force, 1951-1952. He is committed to a career in the Agency and qualifies for full-time academic training as stated in Agency regulation (W 18-8).

6. Funds have been included in the NPIC FY 71 budget for such purposes. Your approval is requested for [REDACTED] to attend the University of Maryland for a year of undergraduate study in geography commencing in September 1970.

[REDACTED]
ARTHUR C. LUNDQUIST
Director

National Photographic Interpretation Center
